Professional Summary

- 4 Years of experience in Microsoft365 and Azure
- Passionate about Cloud Infrastructure, developing creative solutions, and working with businesses to form and maintain healthy relationships.
- Strong knowledge of quality standards and best practices for business security and compliance
- Continually learning the newest technologies to implement in workloads.

Areas of Expertise

6 Years of Customer Service

4 Years in Microsoft 365 Suite

Knowledge of several high level languages

4 Years in Azure

Adaptive to new situations

Management Experience

Professional Experience

Microsoft 365 Escalations Engineer

Assess multiple cases to ensure proper troubleshooting has been completed for a customer's issue and then write up documentation and then direct to internal engineers to resolve issues updating both the customer side and the escalations side simultaneously.

Microsoft Technical Advisor Team Lead

In addition to maintaining my own backlog to assist my team of 9 with their workload I was responsible for assisting with their most complex cases as well as helping adjust their tone/technical jargon to lower level agents so that both parties are on the same page to best assist the issue.

Microsoft Technical Advisor

Prioritize the backlog workflow of 100 tickets to my team of 20 customer support agents. Mastered Microsoft365 Suite to identify features and direct bugs to the proper channels. Automated a data entry pain point in PowerShell to save 10 hours of management time a week.
