

Jason Lore

Microsoft 365 Engineer | Microsoft Copilot Engineer | Cloud & Automation Engineer

Versatile Microsoft 365 engineer with 5+ years of experience supporting enterprise Microsoft cloud environments, Microsoft Copilot deployments, Azure, security and compliance, automation, and technical escalation. Experienced implementing Microsoft 365 solutions across hundreds of customer tenants, developing automation with Microsoft Graph API, PowerShell, Power Platform, and AI technologies, and improving operational efficiency through internal tooling and documentation. Passionate about solving complex technical problems, building scalable automation, and helping organizations successfully adopt modern Microsoft cloud technologies.

Professional Experience

Enhanced Premise Technician (EPT)

Lumen Technologies | September 2025 – Present

- Install, activate, and troubleshoot fiber-optic internet and voice services for residential and small business customers.
- Perform fiber testing using IOLM, PON meters, optical light sources, and power meters to validate signal quality and service integrity.
- Diagnose physical and network connectivity issues while ensuring high customer satisfaction.
- Verify end-to-end service functionality while maintaining quality and safety standards.

Microsoft 365 Engineer / Microsoft Copilot Engineer

Mural Consulting (Supporting Microsoft) | August 2023 – May 2025

- Supported Microsoft 365 and Microsoft Copilot implementations for organizations ranging from SMBs to enterprise customers.
- Worked on a 15-person engineering team responsible for deploying Microsoft Copilot across approximately 500 Microsoft 365 tenants.

Robert Half has interviewed this candidate. We have not verified all representations made by the candidate in this resume. We recommend that our clients also perform their own reference checking.

- Implemented Microsoft 365 tenant configurations, including cloud and hybrid environments, licensing guidance, identity configuration, and onboarding.
- Configured Microsoft security and compliance features including Data Loss Prevention (DLP), AI governance policies, Zero Trust security principles, Multi-Factor Authentication (MFA), and Role-Based Access Control (RBAC).
- Administered Microsoft Copilot through the Microsoft 365 Admin Center while supporting Copilot Agents and AI feature deployments.
- Automated Microsoft 365 administration using Microsoft Graph API and PowerShell, helping transition legacy administrative processes to modern Graph-based automation.
- Developed Power Platform solutions using Power Apps and Power Automate to streamline engineering workflows and support operations.
- Built internal engineering tools that automated issue tracking, improved troubleshooting workflows, and reduced manual effort for support engineers.
- Created AI-assisted technical documentation and knowledge articles that closed documentation gaps and accelerated issue resolution.
- Participated in the migration from an internal CRM platform to Microsoft Dynamics 365 by developing integrations utilizing Dynamics APIs and OpenAI models to transform operational support data into actionable insights.
- Assisted with Microsoft Viva Engage implementation, user onboarding, Microsoft Teams integration, and Copilot adoption initiatives.
- Created AI-generated training materials and presentations using Microsoft Copilot for PowerPoint.
- Supported regulated customers by implementing HIPAA-aligned Microsoft 365 security and compliance configurations.
- Participated in an on-call rotation supporting Microsoft 365 environments.

L3 Microsoft Support Engineer

Mural Consulting (Supporting Microsoft) | August 2020 – August 2023

- Served as an escalation engineer supporting Microsoft Azure, Microsoft 365, Office 365, Windows Server, and enterprise cloud technologies.

Robert Half has interviewed this candidate. We have not verified all representations made by the candidate in this resume. We recommend that our clients also perform their own reference checking.

- Resolved complex production incidents requiring advanced troubleshooting, root cause analysis, and collaboration with Microsoft product engineering teams.
- Captured diagnostic logs, analyzed service failures, and documented remediation procedures for recurring customer issues.
- Authored and improved internal and external technical documentation, including contributions that resulted in updates to Microsoft Learn documentation.
- Streamlined escalation workflows through process improvements and engineering best practices.

L2 Support Engineer Lead

Mural Consulting (Supporting Microsoft) | January 2023 – July 2023

- Led technical operations for a team of Microsoft support engineers handling complex enterprise escalations.
- Mentored junior engineers through technical coaching, case reviews, and troubleshooting guidance.
- Established engineering standards and support processes that improved consistency and operational efficiency.
- Conducted regular one-on-one coaching sessions focused on technical development and escalation quality.

Technical Skills

Microsoft Technologies

- Microsoft 365 Administration
- Microsoft Copilot
- Microsoft Graph API
- Microsoft Entra ID (Azure AD)
- Microsoft Teams
- Microsoft Viva Engage

Robert Half has interviewed this candidate. We have not verified all representations made by the candidate in this resume. We recommend that our clients also perform their own reference checking.

- Microsoft Purview
- Microsoft Dynamics 365
- Power Platform
- Power Apps
- Power Automate
- Azure
- Azure DevOps

Security & Identity

- Zero Trust
- Multi-Factor Authentication (MFA)
- RBAC
- Data Loss Prevention (DLP)
- Security & Compliance
- HIPAA Compliance

Automation & Development

- PowerShell
- JavaScript
- React
- Node.js
- Express.js
- HTML/CSS
- REST APIs
- JSON
- SQL
- NoSQL

Robert Half has interviewed this candidate. We have not verified all representations made by the candidate in this resume. We recommend that our clients also perform their own reference checking.

- Git
- GitHub

AI Technologies

- Microsoft Copilot
- OpenAI Integration
- AI-assisted Documentation
- Prompt Engineering
- Automation using AI

Certifications

- Microsoft 365 Certified: Fundamentals (MS-900)
- Microsoft Certified: Security, Compliance, and Identity Fundamentals (SC-900)
- University of Arizona Full Stack Development Certificate
